

THE JOURNAL OF RISK EDUCATION
SPECIAL ISSUE - Risk Education Moving Forward

The Journal of Risk Education, the only peer-reviewed journal dedicated to risk and insurance education, is seeking completed research and theoretical papers to be considered for publication. Papers on topics related to innovative risk and insurance education are welcome. Specific subject areas include, but are not limited to, pedagogical techniques related to principles of insurance, enterprise risk management, property and liability insurance, life and health insurance, risk control, and alternative risk financing.

All manuscripts submitted for publication in the Journal of Risk Education must include an article abstract, the complete titles and affiliations of all authors, and complete contact information-including e-mail address-for the corresponding author. Please submit your completed paper with the authors' names and any identifying information omitted to facilitate the blind review process.

Electronic proposals are the required format for submissions. Please send your manuscript in Word or Word-compatible and attach to an email. To be considered for the Special Issue scheduled to be published by the end of 2013, submitted articles should be received by September 15, 2013. Please send articles or direct any inquiries to:
